

## Enhancing Synergies for disaster PRevention in the EurOpean Union

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 700342.

# WP3 Development of hazard specific scenarios for RMS

Kevin Fleming and Stefano Parolai, GFZ, Potsdam

## ESPRESSO First Annual Meeting

Bonn – 5th May 2017

United Nations University, Bonn, Germany

# WP3 Tasks

**T3.1 Development of hazard specific reference scenarios according to the project challenges**

**T3.2 Review and implementation of existing methodologies for scenario development and stakeholders knowledge elicitation**

**T3.3 Compilation of a scenario design toolbox**

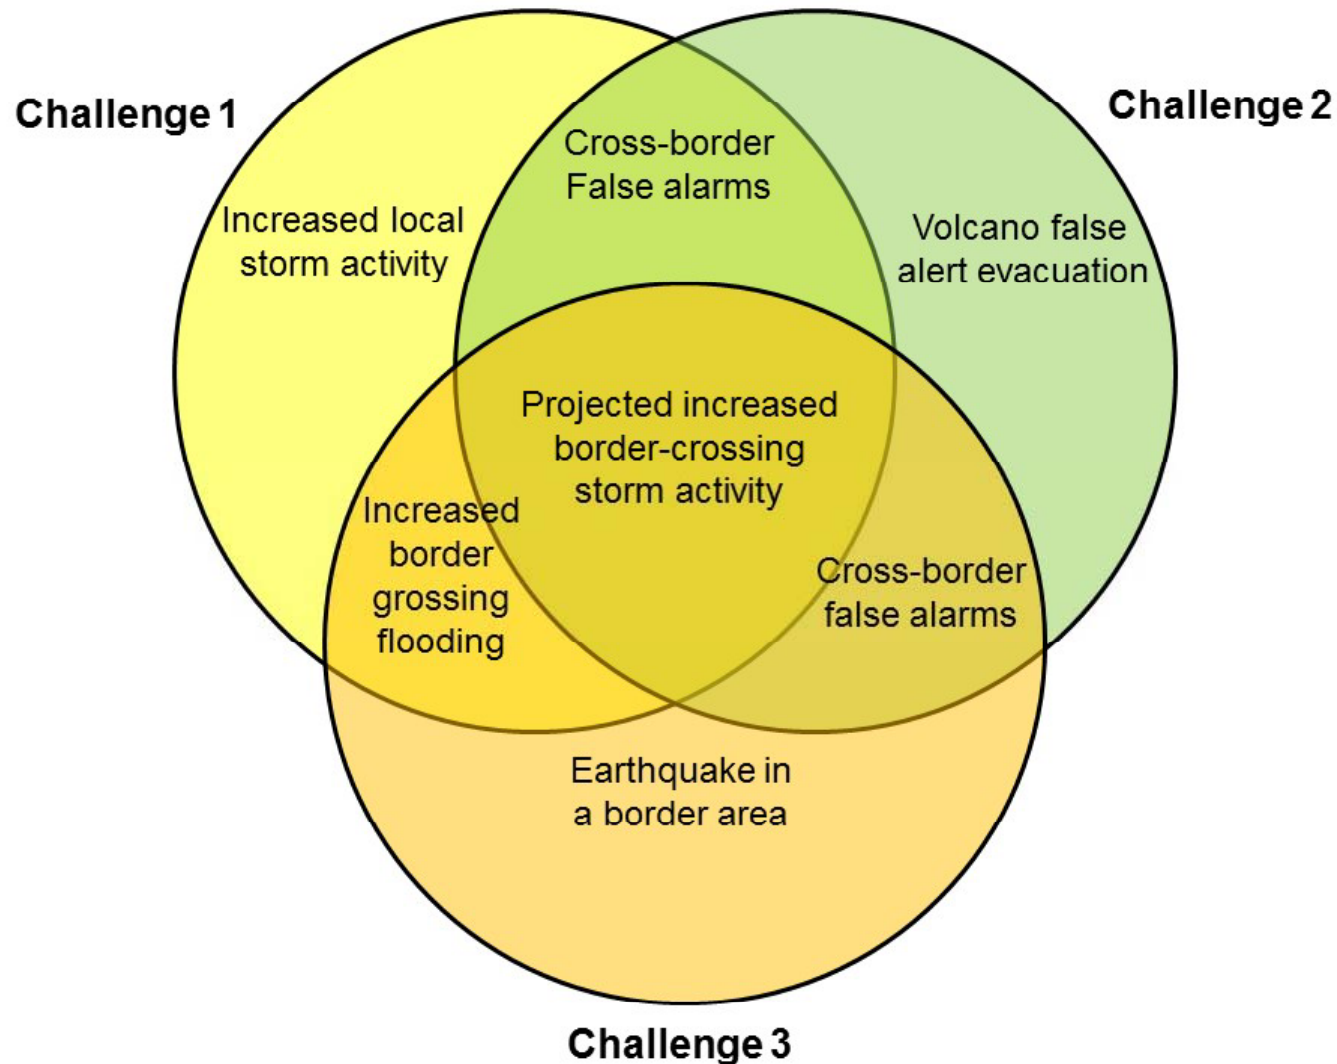

# First deliverable

D3.1 Reference scenarios according to the project challenges

Due month 14 (end June).

Note: this would correspond to the scenario building aspect of the scenario training tool.

# How to classify the scenarios

# Example scenarios

## Defined by hazard

- Earthquake
- Flooding
- Volcano (both immediate effects, and distant, i.e., ash)
- Storms

## Defined by situation

- General change in climatic conditions
- Increasing in size/frequency of weather events (not necessarily extreme)
- Increasing in size/frequency of extreme events
- Changes in legislation, laws, insurance codes

## Defined by questions of interest

- How to improve communication
- How to develop a more resilient culture

# Example scenarios

- Take past storm events, e.g., Storm Lothar, Kiril.
- Earthquake on the Italian/Slovenia border Rhine graben (Germany, France, Holland).
- ‘Revisit’ the 2013 European Floods
- `Expected projection of changes to some meteorological activity`
- Expansion of the European Response Coordination Centre

# Proposed steps

- By the middle of this month, please send some suggested scenarios, and which challenge they fit into.
- By the end of this month, a list of scenarios (relative to the challenges) and proposed questions associated with each will be sent around the consortium.
- Early June distribute first draft of deliverable amongst a selected group of stakeholders (any ideas???) and then finalized the document by the end of the month.
- Internal review – any volunteers – Challenge leaders OR after the end-users will be OK?

# Proposed steps

When will be the first scenario training?

- During the 1<sup>st</sup> Think Tank? The 2<sup>nd</sup>????
- OR have as a session at a meeting people have discussed?  
Problem of stakeholders being there!

# What should we call it?

There are concerns raised about the RMS acronym (Risk Management Simulator, RMS) which was used in the DoW.

Any ideas???

Be imaginative???
